TESTIDE label: spacing spec

All values in millimetres from the top-left corner of the cut line (green). X = left edge, Y = top edge, W × H = size of each object's outline (path bounds, strokes not included). The 1:1 PDF sits exactly on the PO71251 dieline, so it can be placed straight over the working file.

THE RULES BEHIND THE NUMBERS

- **One centre line for the front.** Logo, TESTIDE, tagline, POWERED BY box, statue, rule and bottom text all centre on X 94.94.
- **One top line for the three columns.** The outer top edges of the Facts box, POWERED BY box and Protocol box are level (Y 58.32).
- **One bottom baseline.** The bottom text sits on the baseline of "Miami, FL 33131 • luciddaily.com" (Y 144.69).
- **Protocol box.** Same white space to the crease above and the crease below (4.70). Inside, seven gaps are equal (4.48): box to title, title to DIRECTIONS, captions to WARNING, warning text to STORAGE, storage text to FDA box, FDA box to UPC, UPC to box. Heading to its own text: 2.04.
- **Cap zone.** Logo: 4.77 above (top crease) and below (dashed line). TESTIDE + tagline: 3.79 above (dashed line) and below (crease).
- **Centre column.** POWERED BY box, statue, rule and bottom text scaled together (111.9%) from the top, so their spacing keeps its proportions.
- **When the real UPC goes in.** Keep it centred and keep the seven Protocol gaps equal to each other.
- **Unchanged.** The whole Supplement Facts side, the dieline and dimension marks, fonts, Pantone inks and stroke weights.
